EDUCATING THE REGULATORS

By Rick Lawlor, CGCS

The Town of Yarmouth - Golf Division acquired a new MA DEP WMA Permit effective May 1, 2107. This brought their annual permitted draw from 44 MGA up to 65 MGA; mind you this permit amount includes 45 golf holes and driving range which cover more than 200 acres of land. Besides the usual permit legal requirements, the DEP assigned two significant mitigation measures:

Within 8 years, the Town of Yarmouth must become a completely certified Audubon International Cooperative Sanctuary Golf Course. Within the first year, the Town of Yarmouth must conduct a complete annual evaluation of the wildlife in and around Laban’s Pond, located on the Bass River GC, and implement a continuous monthly monitoring program of its water quality.

These are some pretty hefty conditions for a cash strapped operation, but the town must find a way to comply. They also must find a way to educate the regulators.

The Town of Yarmouth has been utilizing reclaimed effluent water from a regional septic treatment plant since 1997. The MA DEP Discharge Permit allowed for golf irrigation use on 7 of the 27 holes at Bayberry Hills GC. In 2007 the town started exploring the expanded use of this treated effluent discharge for all 27 holes. It was not a well received amendment request because BHGC is on a Zone II Wellhead Recharge Area.

However, with expanding concern for wastewater on Cape Cod, coupled with the physical need to increase septic treatment capacities and thereby necessarily increasing the volume of treated effluent for discharge, MA DEP is close to considering the amendment request. Hell, they’re even studying the possibility of delivering it across town to the BRGC.

What changed? Two things: they needed to learn about the value of grass as a water filtration plant; they needed to deal with an increasing waste problem. They needed to get educated. In Yarmouth the existing treatment plant has already increased its effluent production and there is a second treatment plant construction on the “things to do” list.

In the last ten years of dealing extensively with the regulators of pollution, pesticides, fertilizers and water I’ve learned that the scientific knowledge of our business decreases from the regulators to the legislators to the general public. I’ve learned that when you use the word “education” people are more open to discussion about sensitive subjects. I’ve learned that you must be patient and not pushy, because the toughest part of our job is overcoming misperceptions about golf courses impact on the environment. And, most importantly, the regulators do not move quickly.
President’s Message

It seems like we have seen a little bit of everything in these past few weeks at the golf course. We started out slow with some colder than usual weather only to be followed by near record heat and then the rain. Can we get through just one weekend without the rain? It’s bound to change soon enough and then we will be challenged by other circumstances.

Recently, the association held its annual Scholarship and Research Tournament at Cummaquid Golf Club. Unfortunately the weather did not cooperate and the tournament was cancelled after just a few holes. That was a shame because Dana Hancock and his staff had the golf course in excellent condition. For those that stayed, we had a nice raffle and a great meal to round out the event. As always, a giant thanks goes out to Joe Felicetti for organizing the event and to all of those that donated for the good of the association.

Our next event will be the Rho-Cod Cup to be held at Allendale Country Club and hosted by the Rhode Island Association. I hope we have a good turnout and look forward to seeing all of you there. Also, we have a nice slate of events to finish out the year but our 50th anniversary meeting to be held in September at New Seabury will be extra special. We have some nice gifts planned for all those in attendance so try to set the day aside now so that it is possible for you to attend.

Lastly, we all know the tougher weather will be upon us shortly. Try to set some time aside from your course to attend a meeting. Hopefully the summer will be kind to us all.

Regards,

Brian

P.S. As your president, in the interest of transparency and for the good of the association, if you as the membership deem it necessary, I would semi-reluctantly release my 2016 income taxes.
Welcome New Members:

David Howland Porter, Superintendent Member, River Bend CC
Thomas Hoffer, Associate, Northeast Golf & Turf Supply

Our condolences are extended to Paul Heher and family on the passing of Paul’s father, John (Jack) Heher, on May 4, 2017.

We are looking for photos of our member’s courses for the website. If you would like to have your photo on the website, please email them to Julie at jheston@verizon.net.

If your club or company has been recognized or awarded a distinction, please send us an email at jheston@verizon.net or seymian60@gmail.com. We will mention it in an upcoming edition of The Sand Blaster.

Just a reminder that you can obtain a USGA GHIN number through GCSACC. There is no fee for this. Please contact Julie Heston if you are interested.

The GCSACC Board is looking for volunteers to help the board with tasks and serve on committees. If you are interested, please contact Brian Smoot at briansmoot32@yahoo.com

GCSACC needs a Grass Roots Ambassador to help educate the legislatures. GCSAA 50 States by 2020: GCSANE and GCSACC MA BMP held the first meeting of the editors and started populating the template; reviewed the definitions of committee roles; set priorities and deadlines; identified some outside financial resources; discussed the need for consultants. Water is our section for MA as the state is in the midst of the extensive 20 Year Renewal Process. We will start with the section on Irrigation and consulting with a designer. Want to help, contact me.

Economic Impact Study: GCSACC is coordinating with Daniel Lass, U MA, to complete the survey this summer and publish in the fall. We’ll be in touch.

A Note of Thanks…

TGC at Sacconnesset was honored to host the 108th Massachusetts Open back on Cape Cod after more than 30 years. Thanks to a very supportive membership, the MGA, the great team at TGC and a few individuals the tournament was a tremendous success.

My sincere gratitude goes to the following volunteers:

Dave Beauvais with TPC
Gregg Mackintosh with Atlantic Golf & Turf
Chris Blanchard and John Robinson with The Cape Club
John Perkoski
Garrett Bird

Thank you guys for your time and effort!
Stoyan Muhov
GC Superintendent, TGC at Sacconnesset

Blast from the Past

Since GCSACC is turning 50 this year, we will be highlighting articles from past newsletters in each issue of The Sand Blaster.

GCSACC Scholarship and Research Tournament 2012 ~ Hyannisport Club

May/June 2012
Since GCSACC is turning 50 this year, we will be highlighting articles from past newsletters in each issue of The Sand Blaster.
While you are all working hard to keep your golf courses looking good this summer, I have been attending yet another watershed meeting.

Senator Warren, Selectmen, County Commissioners, E.P.A, D.E.P., the Nature Conservancy and so many of the people that are concerned about our environment, housing and infrastructure commented or spoke at this two day conference.

New technologies and innovative ideas are being implemented as we speak. Construction and monitoring of these projects will go on long beyond our lifetimes. You might want to steer your children and grandchildren towards careers in the environmental industries.

Towns are now working together on shared watershed projects. Harwich, Brewster, Chatham and Orleans have moved ahead together to clean up Pleasant Bay. They could be the first watershed group to get permits from the DEP to act as a watershed. Other towns will follow their model in the future.

Finding funding sources to help pay for planning, sewers, housing and monitoring will be the Cape's greatest challenge.

What you and I do now is really not as much for us as it really is for future generations.

Let us all continue doing the right things to keep the Cape a great place to live and work.

PLATINUM SPONSORS
The 2017 UMass Turf Research Field Day

Date: Wednesday, July 26, 2017

Location: UMass Joseph Troll Turf Research Center, South Deerfield, MA

Join the UMass Turf Team for a morning of education and insight... on our turf! Field Day is the biennial ‘open house’ at the UMass Joseph Troll Turf Research Center. Take a short break from your busy schedule and get the latest on current research at UMass:

- Take a guided research tour with presentations and demos
- Hear about and see projects in the field
- Talk turf with UMass faculty and staff
- Network with colleagues
- Meet with industry exhibitors
- Enjoy continental breakfast and an All American Barbecue lunch

For complete program information, research presentation topics and attendee and exhibitor registration, visit ag.umass.edu/events/fieldday17

Interested in being an exhibitor at Field Day? Multiple packages are available to make what your company has to offer a part of Field Day and support the UMass Turf Program. Visit the link above for details or contact us.

Questions? E-mail fieldday@umassturf.org, call Jason Lanier at 413-545-2965 or Mary Owen at 508-892-0382.

PLANT A LEGACY
WWW.BARUSA.COM
Kevin’s GCSAA Corner
By Kevin Doyle, GCSAA Northeast Field Representative

In my travels around the Northeast and throughout the country, I’ve noted that the status of the golf industry continues to be a hotbed topic of conversation. As an industry we are continually addressing issues related to the environment, player growth, agronomic practices, regulatory pressures and many others, but we have always been united in our support of outreach and education. Our commitment is evident in countless community and national programs, and strengthened immeasurably by the involvement of every golf professional, facility and allied organization.

The success of the 2017 National Golf Day exemplifies the value of collaboration within our industry and the progress that can be achieved by working together. While this massive undertaking every year encompasses all the allied groups we are most familiar with: CMAA, GCSAA, NGCOA, PGA TOUR, The PGA of America, USGA, U.S. Golf Manufacturers Council and the World Golf Foundation, it is important to understand that they are not the only ones benefitting or advocating for our game and turfgrass management.

Below is a small collection of initiatives that too often fly under the radar but with further support, could be even more amazing and beneficial to all of us who love the game.

Wee One Foundation
The Wee One Foundation was founded in 2004, when friends of Wayne Otto, CGCS, banded together to financially assist him in his battle with cancer. Wayne was a pioneer in the turf industry, always searching for new and better ways to produce a finer playing surface. As Wayne learned more about his disease, he applied those same pioneering principles to overcome his illness.

Through the perseverance and hard work of several of Wayne’s friends, a mission was developed to help those in need. Founded on the principle of assisting golf course management professionals (or their dependents) who incur overwhelming expenses due to medical hardship or who are without comprehensive insurance or adequate financial resources, the Foundation has evolved into a cause that goes way beyond its initial reason for existence.

Since its inception, the Wee One Foundation has gifted over $1,000,000 to those in need. The Foundation raises money through its membership, golf outings and sponsorships.

If you need help or know someone who does, visit the Foundation website at www.weeone.org

The First Green
The First Green is an innovative environmental education outreach program that uses golf courses as environmental learning labs. The program has extensive resources for golf course superintendents, including online lesson plans, and facilitates connections between golf courses and local schools and science/horticulture teachers.

Golf superintendents, course staff and/or local industry representatives (such as regional associations and members) host students on field trips, where they test water quality, collect soil samples, identify plants, preserve wildlife habitats, assist in stream-bed restoration and learn about the ecology, conservation and environmental aspects of golf courses. The kids also visit the practice green or hit balls at the driving range – giving them their first taste of the game.

First Green has been providing STEM (science, technology, engineering and math) learning labs since 1997. To learn more about The First Green, or to read about a 2013 field trip, visit The First Green (www.thefirstgreen.org) or the Connecticut Clippings newsletter (www.cagcs.com/pdf/ctclippings_june13.pdf).
**Project EverGreen**

Project EverGreen is a national non-profit organization committed to creating a greener, cooler earth by supporting the creation, renovation and revitalization of managed recreational and athletic green spaces that result in healthier, happier people. Initiatives include GreenCare for Troops, SnowCare for Troops and “Healthy Turf. Healthy Kids.”

Project EverGreen’s GreenCare for Troops and SnowCare for Troops programs provide complimentary lawn and landscape services, and snow and ice removal services for the families of currently deployed military personnel, as well as post 9/11 disabled veterans with a service-connected disability.

Studies confirm there is significant value in having children spend time outdoors playing, and Project EverGreen’s “Healthy Turf. Healthy Kids.” has its sights set on restoring and revitalizing green spaces, including sports fields and parks, for children to play, exercise and connect.

To learn more about Project EverGreen and how you can participate, visit [www.projectevergreen.org](http://www.projectevergreen.org).

**The Grass Roots Initiative**

The U.S. National Arboretum’s Grass Roots Initiative is a four-year, in-depth look at the science behind this familiar, but often misunderstood, landscape plant.

The exhibit opened in October 2014 with 12 interactive displays, and two more were added the following year. Each section provides information about the uses of turfgrass, its importance to modern society, its history and best management practices for maintenance. Among the displays are a compact golf hole, sports fields, lawn areas with swards of six warm-season and four cool-season turfgrass species, more than 30 different ornamental grass species, and a rain garden showing the ability of grass to absorb water and nutrients.

To learn more about the National Arboretum’s turf display, visit [www.usna.usda.gov/Education/turfgrass](http://www.usna.usda.gov/Education/turfgrass).

Please understand that this is not a plea to support each of the above initiatives. In some form or fashion, GCSAA already has a relationship with these groups, so you as members do too! This information is offered simply to keep you informed of the resources available to you and benefitting you.

Should you need help as you get started growing the game by hosting a local school, or working to benefit a local service member, just understand you are not alone. There are resources and people ready, able and quite willing to assist you in achieving your goal. Now you know who and how to ask!

**GCSAA Resources and Deadlines**

**you Get Cool Stuff from your Association Already:**

**GCSAA welcomes Bayer Environmental Science as presenting sponsor for Can Am Cup golf event**

Bayer Environmental Science will be the presenting sponsor of the Can Am Cup, the upcoming Canada versus United States golf competition between golf course superintendents. The point-quota competition will be held in New Jersey, Oct. 22-24, at two championship golf clubs: Baltusrol Golf Club in Springfield and Canoe Brook Country Club in Summit. Registration will open online at 1 p.m. (Eastern), June 20, for members of the Golf Course Superintendents Association of America (GCSAA) and the Canadian Golf Superintendents Association (CGSA). Look for more information at [www.thecanamcup.com](http://www.thecanamcup.com). Space is limited and will be capped at 240 players. The participants, who will be paired according to USGA or Golf Canada official handicaps, will enjoy two rounds of golf and have the opportunity to earn education points.

GCSAA Investigating Political Action Committee
GCSAA is exploring the launch of a political action committee in the fall of 2017. During 2016, government affairs staff presented the concept of a GCSAA PAC to the Government Affairs Committee, GCSAA Board of Directors and chapter delegates, and are now seeking feedback from the general membership on a GCSAA PAC. More information, and to view videos follow this link. BE SURE TO PROVIDE YOUR FEEDBACK!

GCSAA partners with Columbia Sportswear for member discounts
GCSAA and Columbia Sportswear Company, an industry leader for outdoor apparel and products, have joined in a partnership to bring savings to association members and their facilities. Columbia is offering a 50 percent discount to GCSAA members on outdoor wear purchases. Read more

2018 Dog Days of Golf Calendar
Submissions for the 2018 Dog Days of Golf Calendar will be accepted through Aug. 1, 2017. From the submissions, 14 dogs will be selected. Owners of the selected dogs will be notified in September, and the calendar will be distributed with the November issue of GCM magazine.

Plan now to stop by the LebanonTurf booth at the Golf Industry Show in February to place your vote for the 2018 Dog of the Year. The winner’s owner will receive a $500 prize and $3,000 for his or her GCSAA-affiliated chapter. A $2,000 charitable donation will also be made by GCSAA and LebanonTurf in honor of the winner. http://www.gcsaa.org/dog-calendar/submit-dog-calendar-photo

**Spectacular Shortcut Bluegrass. Fantastic Fine Fescue. Beautiful Bentgrass. Only at Sodco.**

**Shortcut Bluegrass** is a mix of Kentucky Bluegrass varieties, maintained at a height of 5/8 inch.

Our shortcut blue is grown with a blend of dwarf bluegrass to be able to handle the low height of cut, which makes this sod perfect for tee boxes.

**Sodco’s Fine Fescue** is a 90/10 fescue/bluegrass blend that is ideal for golf course rough areas.

The fine fescue has a finer leaf blade that is more shade tolerant and requires less water and fertilizer than a standard bluegrass blend.

**Sodco is currently growing Fairway Height Pennway Bentgrass,** ideal for repairing and replacing fairways before the summer golf season.

Additionally, Sodco offers contract growing opportunities to meet your specific bentgrass variety needs.

007/Declaration Greens Height Bentgrass, Pure Performance Fairway Height Bentgrass & Shortcut Black Beauty coming soon!
